Hello everyone, this is Atishay.

This is the unofficial session.

Every number in here is from our own cell's sheets.

TODAY

What we'll talk about

1. Why we're here
2. This season
3. Where to apply
4. Engineering vs MBA
5. Your road
6. Your numbers
7. Live
8. After today
9. The cell and you

WHY WE'RE HERE

Why everyone is in this room today.

- Mid-session reviews are done, for every one of you.
- New juniors are recruited.
- Every current cell member from 2029 and 2028 is here. That is on purpose.
- 2030 is not here, and the mid-review result is held back. Also on purpose.

I wanted to talk to every one of you, one last time.

WHY THIS MEET, WHY BEFORE THE MID-EVAL

The cell will place you. At what package? Ask that.

- Many of you think the cell alone gets you placed. It does. Look at the number it places you at.
- I'll fight for you. Will you put in the work?
- It's your career. My gain is at most a DM or a party.
- No personal grudges with anyone. Ask anything, any time today.

Anonymous questions: add ASK_URL

THIS SEASON, SO FAR (TILL 15 OCT)

The college alone will not get you there.

40
drives: 16 internship, 9 internship + job, 15 job

27 of 40
happened in August and September

7.7 LPA
median CTC (28 drives state one), 3.6 to 21

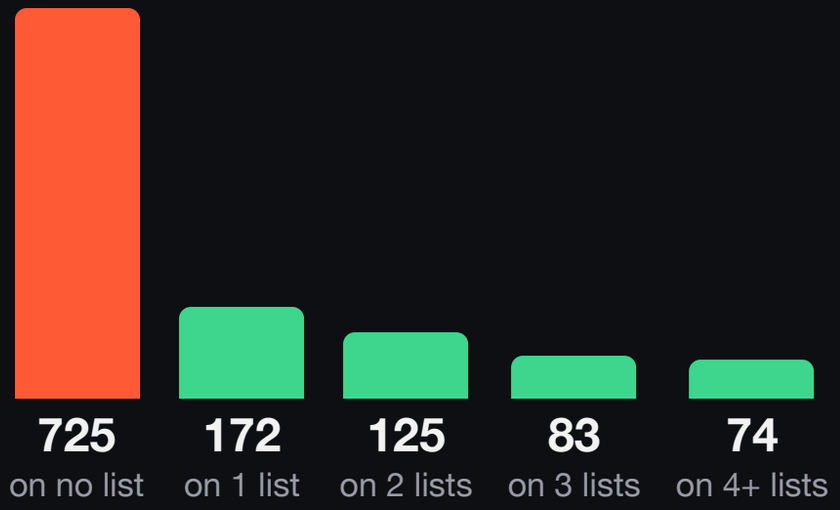

₹25k
median stipend a month (18 drives)

2027 batch: 1,179 registered, 454 cleared at least one round.

THE 2027 BATCH, ON CAMPUS

On campus, it's cooked: 725 of 1,179 (61%) have not cleared a single round.

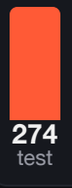

2027 batch: how many drive lists each student is on

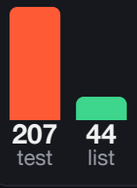

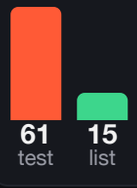

- 1,179 registered for placements
- 454 are on at least one list; 282 are on two or more
- 13 drives this season have a Results or interview sheet
- A list is a stage result, not an offer. The real offer count is lower.
- This is the batch above you, three months into its season.

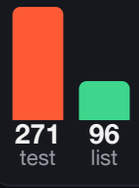

EVERY DRIVE, TEST TO LIST

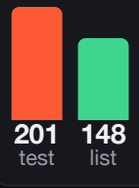

Every 2026-27 drive with a sheet: who sat, who got interviewed, who made the list.

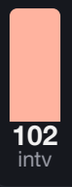

Drive 20-07-2026-02

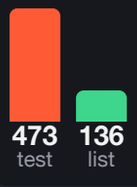

Beghou Labs

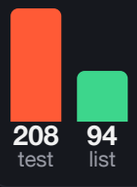

Renishaw Metrology

Quantiphi

Trinamix

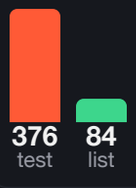

Addverb

Deloitte (Dream)

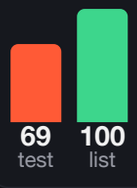

ITGeeks

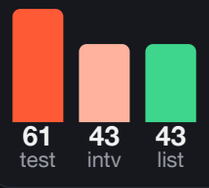

DCM Shriram

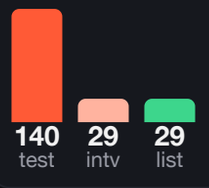

Larsen & Toubro

LTM (Day-1 mass)

Axxela Research

Futures First

Forbes Marshall

iCuerious Research

test = filled seats on the lab allocation sheet; intv = interview-tracking sheet; list = Results sheet (a stage list, not offers). Some lists cover more than one stage, so a list can be longer than the test count. Interview-tracking sheets the cell can see: 2025 batch 6 drives, 165 students; 2026 batch 8 drives, 296 students; 2027 batch 4 drives, 160 students.

EVERY COMPANY THIS SEASON

All 40 drives of 2026-27, by CTC.

Company	Type	CTC LPA	Stipend /mo	10/12 cut	Branches
Infosys (Super Dream)	Job	21.0	-	65%	CSE, ECE, EE, EI, IT

MONEY AND THE CALENDAR

Most CTCs sit between 5 and 12 LPA. The season runs August to October.

CTC of each drive that states one (28), LPA

Stipend a month (18 drives), ₹

Drives by month, 2026

Jan	Feb	Mar	Apr	May	Jun
	1				
Jul	**Aug**	**Sep**	**Oct**	**Nov**	**Dec**
3	14	13	9		

- CTC buckets: under 5: 4, 5 to 8: 11, 8 to 12: 10, 12 and up: 3
- Median CTC 7.7 LPA; median stipend ₹25k
- Oct counts only run to 15 Oct

BRANCH IS NOT THE EXCUSE

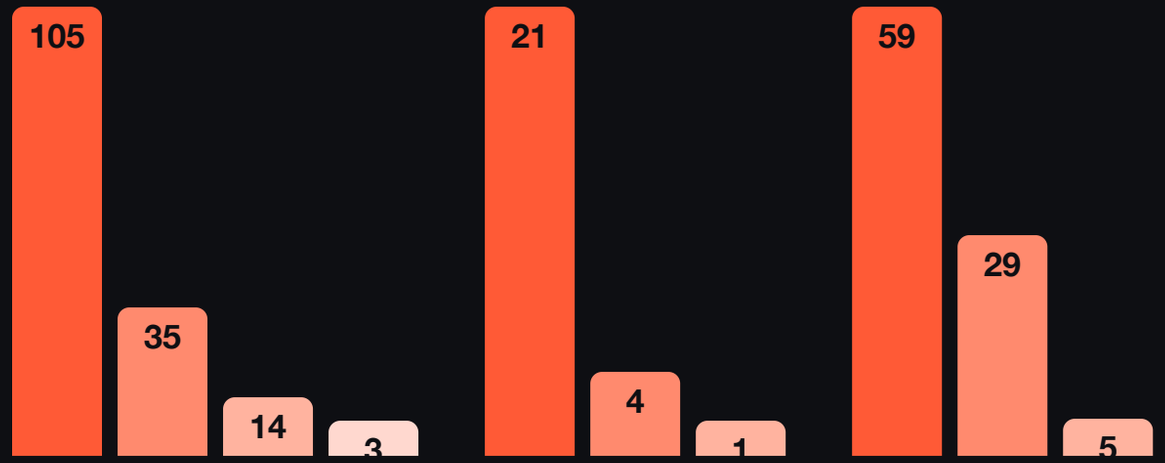

Mech gets 28 of 40 drives. CSE gets 29. The gap is preparation.

Branch	Drives open (of 40)	Registered	On 1+ list	Rate	On 2+ lists	On none
IT	29	156	87	56%	56	69 (44%)
CSE	29	165	86	52%	56	79 (48%)
EI	32	117	58	50%	41	59 (50%)
ECE	28	116	55	47%	35	61 (53%)
EE	26	119	51	43%	27	68 (57%)
Mech	28	116	45	39%	32	71 (61%)
IP	19	115	35	30%	22	80 (70%)
Civil	20	118	28	24%	10	90 (76%)
BME	13	87	9	10%	3	78 (90%)

A "list" = a 2026-27 Results or interview-tracking sheet. Being on one means you cleared at least that stage. Not an offer.

INTERVIEWS AND THE GATE

Less than half get past the first interview.

Across 12 drives with interview sheets: 519 did round 1, 202 did round 2 (39%). The three steepest drives.

Before the test: your 10th and 12th marks

- 13 drives ask for 60%
- 14 ask for 65%
- 11 ask for 70% or more
- 4 of 40 come with a service bond

THE COMPANIES ARE OUTSIDE

Our cell called about 1,904 companies this summer. 14 of them came here.

1,904

companies in our calling list, from the recruiter lists of 31 other colleges

105

companies on the cell's priority list pay 10 LPA or more

Off-campus is not plan B. It is where most of the companies are.

ENGINEERING VS MANAGEMENT

Engineering is getting harder. MBA is not an escape hatch.

Engineering: our own sheets

- Median 7.7 LPA across 28 drives that state a CTC
- 27 of 40 drives landed in August and September

Management: my read

- My view, Oct 2026: engineering placements are trending down overall.
- Per what I have seen: IIM Calcutta, three months in, about 100 placements.
- XLRI's placecom placed their entire batch. Look at how.
- I'm going for an MBA. Taking CAT? DM me, we study together.

Reel 1: add link | Reel 2: add link | Reel 3: add link

ENGINEERING TODAY

Quick question: what is software development?

Tech is compressing

- It's an umbrella word for fifty different jobs, not one.
- One engineer now does many of them. Know more than one thing.
- My work so far: an STT eval harness, AI evals, a desktop app, field visits, L1 support, patents.
  - I'll open my LinkedIn and show you.

Core is not dead

- Embedded, VLSI, avionics, aerospace: design and test, end to end.
- It's the future, if you commit to it.
- I can get you contacts, up to the gate. Getting in is your work.
- If I don't have the contact, I'll find it.

PICK YOUR ROAD

MNC or Dev? The road decides the work.

MNC / product OA

- Competitive programming is the filter
- Contest rating > random question count
- LeetCode + Codeforces contests, every week

Dev / startup

- Open source is the proof
- LFX mentorship is open right now
- Merged PRs in real orgs > tutorial projects

Either road: finish one sheet (Striver A2Z / NeetCode 150 / CSES) before you count questions.

WHAT I KEEP TELLING JUNIORS

The same eight things, every time someone asks.

1. Ten tailored applications beat five hundred generic ones. Read the company, make the CV for it, mail the founder.
2. Learn concepts, not languages: microservices, pods, scaling. Everyone needs some JavaScript, APIs and SQL.
3. Under 200 LeetCode? Don't quote the number. Keep solving. I still do.
4. Say what your project did, with a number. Nobody can see it ran for the whole college.
5. Startups worry you won't show up. Say when you can join, and keep it.
6. Walk up to seniors without hesitation. Ask one concrete question about your road.
7. DSA gets you in the door. Development is the longer game: it never stops changing.
8. Bangalore is always open. Off-campus is not luck if you start in second year.

YOUR CV AND YOUR INTERVIEW

Before you walk into any interview.

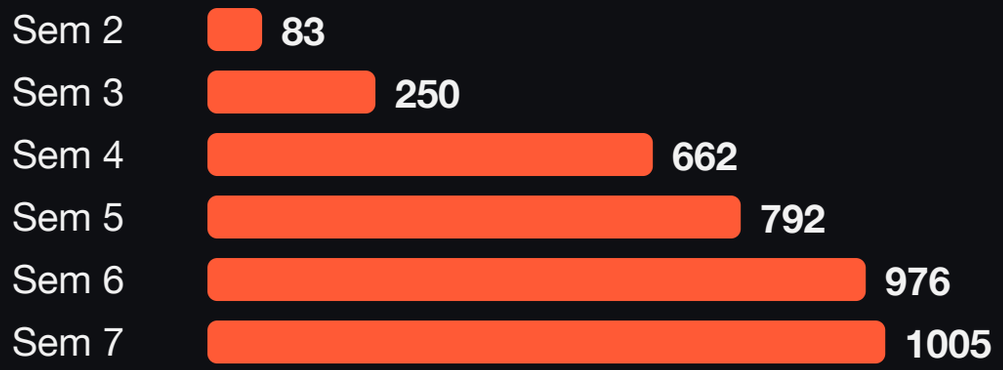

1. Three solid projects, two internships. Headline each by what it does, then explain how.
2. Know your terms cold. Fumbling the words reads as not having studied.
3. Prompt your own project into 15 points, then mock-interview yourself out loud.
4. Read every line of your CV: about half the questions come from it (my estimate). Carry a college-format hard copy.
5. MNC portals gave me zero replies, follow-ups included. HR filters on college name. Go through people.
6. The 2026 graduates' market lands in 2027. "Lots of time" is the trap.

> **Checked today:** a Target opening came up. I looked at our alumni working there. Every one of them has a master's. Before you apply, look at who actually works there. That is the real bar.

MY NUMBERS, CHECKED

ICPC regionalist, mechanical branch. Here's the real count.

LeetCode solved, end of each semester

Estimated from my LeetCode submission calendar.

- LeetCode: 1005 solved · contest rating 1786 · top 9%
- Codeforces: 1314 (peak 1539) · 108 problems
- CodeChef: 314 solved · AtCoder: 36
- About 1,460 across all four

YOUR TARGETS

Hit these by the end of each semester.

Semester	Problems	Also
Sem 1-2	Start. 0 is fine.	Pick one language, learn it properly
Sem 3	200	First contests, any rating
Sem 4	350	Weekly contest habit
Sem 5	600+	Internship OAs start here: be ready
Sem 7	900+	Placement OAs: rating matters more than count

THE GAME

Where are you, right now?

Semester

5

LeetCode solved

e.g. 240

Codeforces handle

optional

Type your numbers and hit Check.

LIVE LEADERBOARD

Who's leading the room?

nickname | LeetCode solved | Codeforces handle (optional) | Add

Shown on the speaker's screen to everyone in the meet. Use a nickname; Instagram handle optional.

#	Nickname	LeetCode	CF rating	Score

Leaderboard: could not load (404)

YOUR GOALS

Next 6 months. Next 12. Next 2 years.

6 months | the goal, in a line | nickname (optional) | Add

Shown on the speaker's screen to everyone in the meet. Use a nickname; Instagram handle optional.

Goals: could not load (404)

6 months

12 months

2 years

LIVE: OPEN SOURCE

Watch me find and solve an issue. Right now.

- Find the org: LFX / CNCF / GSoC lists, filter by your stack
- Find the issue: 'good first issue', recent activity, maintainer replies fast
- Comment first, then build, then a small clean PR
  - Live demo: one real issue, start to PR
- One merged PR in a real org beats five clone projects on a resume

LIVE: COLD MAIL

My real count: about 125 first mails over five months. Plus follow-ups.

- Casual, not formal. Subject: builder, looking for <role>.
- Line 1: proof of work, with a link and a number
- Line 2: why this company, specifically
- Line 3: I can join now, zero notice period. CV attached.
- Send it to the address on the job post. One person, not ten.
- Follow up. The content decides replies, not the count.
  - Live demo: I'll write one in front of you

LIVE: LINKEDIN DM

Let's write one together.

Hi name,

I'm you, branch batch at SGSITS, your junior. I saw you work on team / product at company.

I've built one proof, with a number.

Could we talk on a call this week? When are you free?

- Message seniors from our college, or people doing the exact work you want.
- First message asks for a call, not a referral.
- When they reply, call. Talking beats typing: a message is secondary for them.
- Same college is not a free pass. It's hit or miss, so send more than one.
- No reply? Follow up once, politely.

A NOTE FOR SOME OF YOU

An important note for

- Calling brings companies. It really does.
- Our cell called about 1,904 companies this summer. 14 of them came here.
- Tell me now: why do calls fail? We fix those reasons, one by one.

WHAT WE'RE BUILDING

Our own Point Blank. And CodeForster comes back.

- DSCE's Point Blank: synced IDs, one leaderboard, a culture that codes
- Ours: Placecom + Hash Include + CodeForster, one tracker
  - You enter your handles once; progress tracks itself, semester by semester
- CodeForster as a hardcore coding club: contests, upsolving, sheets, together. No events for the sake of events.
- Open source, so you run it after I leave.
- Monthly 1:1 profile check-ups. Ask your seniors; if they don't, ask me. You come to me.
- Points of contact from 2028 and 2029, for engineering and for management.
- Make a LinkedIn group. React to each other's posts. Are we connected?

CELL TEA

What the cell has taught all of us. No names, promise.

- Reviews look at how you talk, code and carry yourself. Not just the tasks you ticked.
- The most common complaint about any batch: too casual.
- Groupism splits fast: sixteen become eights, then fours, then twos.
- Small courtesies get noticed. So does skipping them.
- People go quiet once they're placed. Seniors remember who didn't.
- Cell interviews start friendly, then dig into whatever you wrote on the form.

MAKING THE CELL WORK FOR YOU

What the TnP cell is, and how to use it.

What the cell is

- The team that brings every on-campus drive here
- Summer calling: 1,904 companies called this year
- Drive duty, HR calls, registration checks, reviews
- A senior network across every company that came

How it pays you back

- Talk to your seniors. Ask early, ask often.
- Never let a senior down. Never play with their expectations.
- Stay in touch, even after you are placed.
- Some of your favourite seniors will be in other cities. One message keeps the door open.

Count. Contest. Contribute. Cold mail.

Questions now. The targets sheet goes out after the meet.
